Description of the sample

Name and designation according to the data of the customer:
LDPE: HIPTEN 21018 A6

Intended use: contact with food

Preparation of the sample

According to the request of the customer, we performed the analysis of the total extracted substances into hexane and xylene.

Sample preparation according to the FDA CFR-Code of federal regulations: Title 21, Volume 3, Sec. 177.1520 Olefin polymers, Extraction into hexane and xylene (low density).

Analytic results are enclosed.

Assessment of the results

Shown are all results with annexes.

Parameter	Result	Unit	Norm	Compliance
Other parameters				
Extraction into hexane at 50 °C	0.42	%	5.5	compliant
Extraction into xylene at 25 °C	4.11	%	11.3	compliant

Criterion-Limits according to:

FDA CFR- Code of Federal Regulations Title 21, volume 3, Revised as of August 31, 2023, (CITE: 21 CFR177.1520), Sec.177.1520 Olefin polymers, Ekstrakcija v heksan in ksilen (low density)

Results of the analysis

According to the requirements of the costumer, we analysed the total extracted substances into hexane and xylene.

The total extracted substances into hexane and xylene, determined as the mass of the dry residue after the extractions, were lower than the limit values, as given in FDA CFR-Code of federal regulations, Title 21, volume 3, Revised as of August 31, 2023, (CITE: 21 CFR177.1520), Sec. 177.1520 Olefin polymers, table Olefin polymers, point 3.1a, (Low density - extraction into hexane and xylene at 50°C and 25°C).
